

Managing and Maintaining a Microsoft Windows Server 2003 Environment

M2273

5 day

Overview :

This course provides students with the knowledge and skills that are required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data in a Microsoft Windows Server™ 2003 environment. This is the first course in the Systems Administrator and Systems Engineer tracks for Windows Server 2003 and serves as the entry point for other courses in the Windows Server 2003 curriculum.

As this is an accelerated course, involving instructor led training and self-study, some evening study will be required during the course.

Target Audience :

This course is intended for individuals who are employed as or seeking employment as a systems administrator or systems engineer. This course is also offered as eight days of instructor-led training (as two courses) for students who prefer a complete classroom training experience:

- M2274: Managing a Microsoft Windows Server 2003 Environment (5 days)
- M2275: Maintaining a Microsoft Windows Server 2003 Environment (3 days)

At the end of the course, delegates will be able to:

- Create and populate organizational units with user and computer accounts.
- Manage user and computer accounts.
- Create and manage groups.
- Manage access to resources.
- Implement printing.
- Manage printing.
- Manage access to objects in organizational units.
- Implement Group Policy.
- Manage the user and computer environment by using Group Policy
- Audit accounts and resources.
- Prepare to administer server resources.
- Configure a server to monitor system performance.
- Monitor system performance.
- Manage device drivers by configuring device driver signing and restoring a device driver.
- Manage hard disks.
- Manage data storage.
- Manage disaster recovery.
- Maintain software by using Microsoft Software Update Services.

Course Content :
