

## Network Admission Control

Varighed: 3 Days    Kursus Kode: NAC

### Beskrivelse:

Network Access Devices (NADs) Switch (layer 2): NAC Phase 2 Network devices that enforce admission control policy on switches. This devices demand host security "credentials" and relay this information to policy servers, where network admission control decisions are made. Based on customer-defined policy, the network will enforce the appropriate admission control decision, permit, deny, quarantine, or restrict.

### Målgruppe:

Cisco Channel Partners/Resellers, Customers, Employees

### Agenda:

- Understand how Cisco NAC operates
- Configure Cisco Secure ACS to operate as a Cisco NAC AAA policy server
- Configure Cisco IOS routers, switches, and access points to act as Cisco NAC NADs
- Configure Cisco agents to act as Cisco NAC clients
- Configure a Trend Micro policy server to operate as an external Cisco NAC policy server

### Indhold:

	Understanding Cisco NAC	Configuring Cisco Switches for Cisco NAC
Course Introduction	Configuring Cisco Secure ACS for Cisco NAC	Configuring Cisco NAC Agents
Implementing Cisco NAC	Configuring Cisco Routers for Cisco NAC	Configuring Wireless Access Points for Cisco NAC
